Bo2W project: report chapter on Ghana analysis available

7th of May 2014 by Stefanie Degreif

In this report chapter our colleagues have prepared the general status analysis of Ghana as well as the issue of the generation of WEEE and ELV in Ghana until 2025. Furthermore the status analysis regarding collection, sorting and pre-treatment in Ghana is discussed in this publication.

The document is available here: <http://www.resourcefever.org/detail/items/global-circular-economy-of-strategic-metals-bo2w-chapter-ghana.html>
